EVENTS

CHARTER COMMITMENT NAPOLEON EVENTS SUSTAINABLE EVENT

Concerned about our environment, Napoleon Event is resolutely committed to sustainable development. This consists of a long-term mobilisation through a reflection/analysis of processes during the preparation of our events.

All our events are eco-designed: media, printing work, reusable badges, non-disposable saddlebags, equipment rental rather than purchase...

We recycle scenography elements and favour a distribution of usable elements to associative platforms.

Plastic water bottles are replaced by a rented water fountain. We provide reusable cups (eco cup made in France).

We favour short circuits and work mainly with service providers and suppliers in the region.

A request for an energy diagnosis of the place is systematically made before renting.

We optimise the equipment used (sound system, lighting, etc.). We favour energy-saving equipment that meets the criteria of the Energy Star label or the European eco-label.

We print our Staff and Backstage badges on an environmentally-labelled material. It is printed with inks that contain biomass, which makes it possible to obtain a carbon neutral balance when recycling.

We set up a system for sorting the waste produced by our events (paper, car-tone, glass, plastics...) and manage their transport to sites dedicated to professionals. For cleaning, we favour the use of cleaning products based on natural active ingredients and with a very low impact on the environment.
